

Catalyst's Large and Super-wide Format printing services start with professional product consultation to assure that the product that we produce is the right one for the job. Our support includes complete file prep guidance, color-space support, and electronic file transport via FTP over the internet. Platforms including Linux, Windows, Unix, and Macintosh are accepted. Soft proofing (via e-mail), or Substrate proofs are also available. Our Large-Format printing department features high quality printers by Hewlet-Packard and Epson. There are print resolutions for all applications up to 1440dpi. Also, Catalyst Imaging is proud to feature super-wide outdoor printers by NUR Macroprinters, the highest quality solvent based printers available. We offer several options from promotional to long-term outdoor durable prints.

We offer an array of post-printing options from laminating & mounting, to Die-cutting & Fabrication. Custom design and implementation of display systems and structures are among some of our signature services. Archiving and Data Management services can simplify your workflow and secure your confidence in speedy repeat orders. Building dependable relationships and good communication is an ongoing effort at Catalyst, this helps to ease the pressures of meeting deadlines. Quick turn-around is the standard, completing most projects in three days. Finally, at Catalyst we believe that pleasing your customer is our ultimate goal.

"...Building dependable relationships and good communication is an ongoing effort at Catalyst...."
